

DIGITAL SERVICES

It is crucial to provide users with usable, accessible, and delightful digital solutions. Human-centered software development is in the core of our heart.

Problem

Solution

LOW ADOPTION RATE

Your product doesn't resonate with your intended audience. Maybe you've made revisions and redesigns, but users are still not signing up.

UX Research

Prioritize USER

WITH USER RESEARCH, WE HELP YOU:

- Know your audience – expectations and pain points
- Align your product with your users
- Catch problems early, avoid costly redesigns and development time

UNCLEAR DIRECTION

Inefficient or inadequate resources and planning lead to the development of non-essential or low-priority features. Starting wrong is the biggest waste.

Service Design

USER-CENTERED

WITH SERVICE DESIGN, WE HELP YOU:

- Define what you are creating and why – before running to solutions
- Concept the service with users in mind

LOW USER SATISFACTION

Your users queue in undesired channels, load you with negative feedback, and are puzzled with misunderstandings.

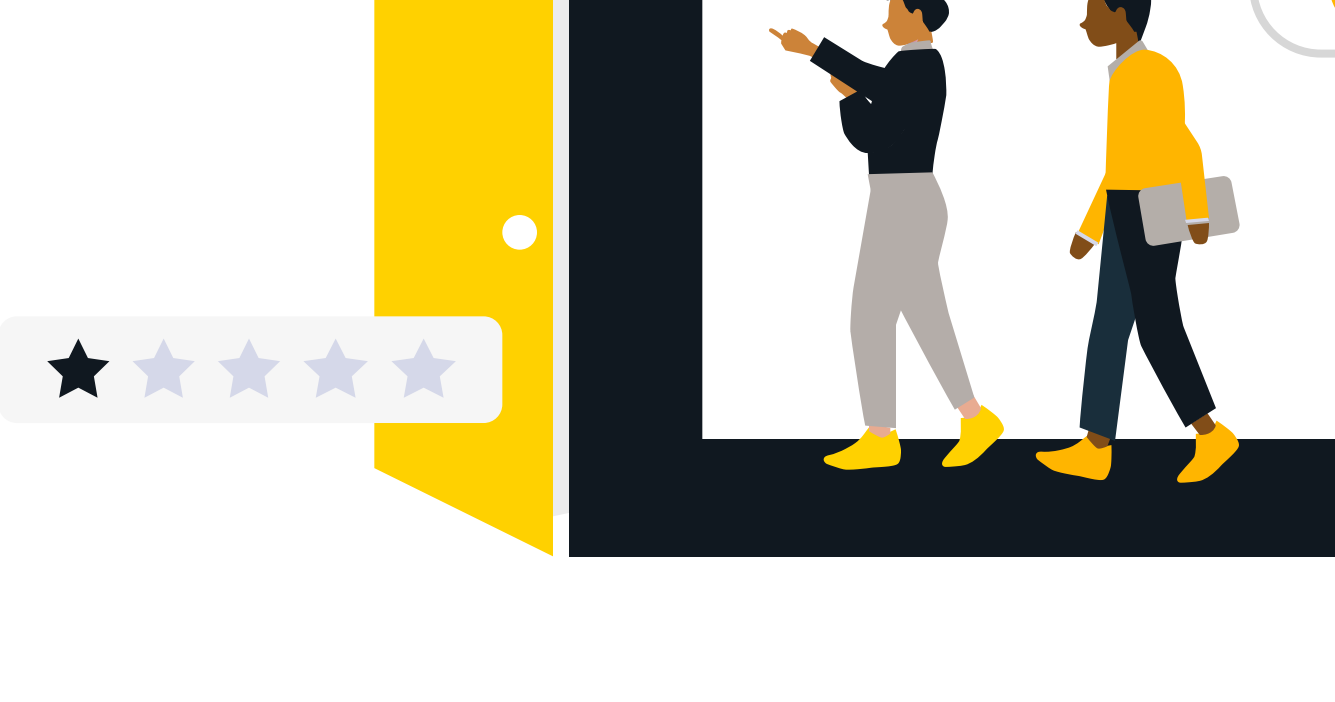

UX/UI Design

SEAMLESS EXPERIENCE

DON'T WORRY, WE CAN STILL HELP:

- Design a functional user interface that also looks great
- Find potential usability and accessibility gaps early

HIGH CHURN RATE

Users come in, but they don't stay. The problem stems from various accessibility barriers that hinder users' ability to navigate, interact, and fully engage with your platform.

User Testing

INVALUABLE INSIGHTS

WITH USER TESTING, WE HELP YOU:

- Test your products with real users
- Identify usability & accessibility issues and discover how they affect your users
- Pinpoint which solutions bring value and which ones hurt the overall experience

INEFFICIENCIES IN DEVELOPMENT

Is your business still relying on traditional development approaches? Have you experienced delays, missed market opportunities, and rising development costs?

Agile Software Development

CLEAR ROADMAP

DON'T WORRY, WE CAN STILL HELP:

- Find the pain points and strengths in your development process and tools and create a clear roadmap for improvements
- Turn your deployment pipeline into a value generation pipeline

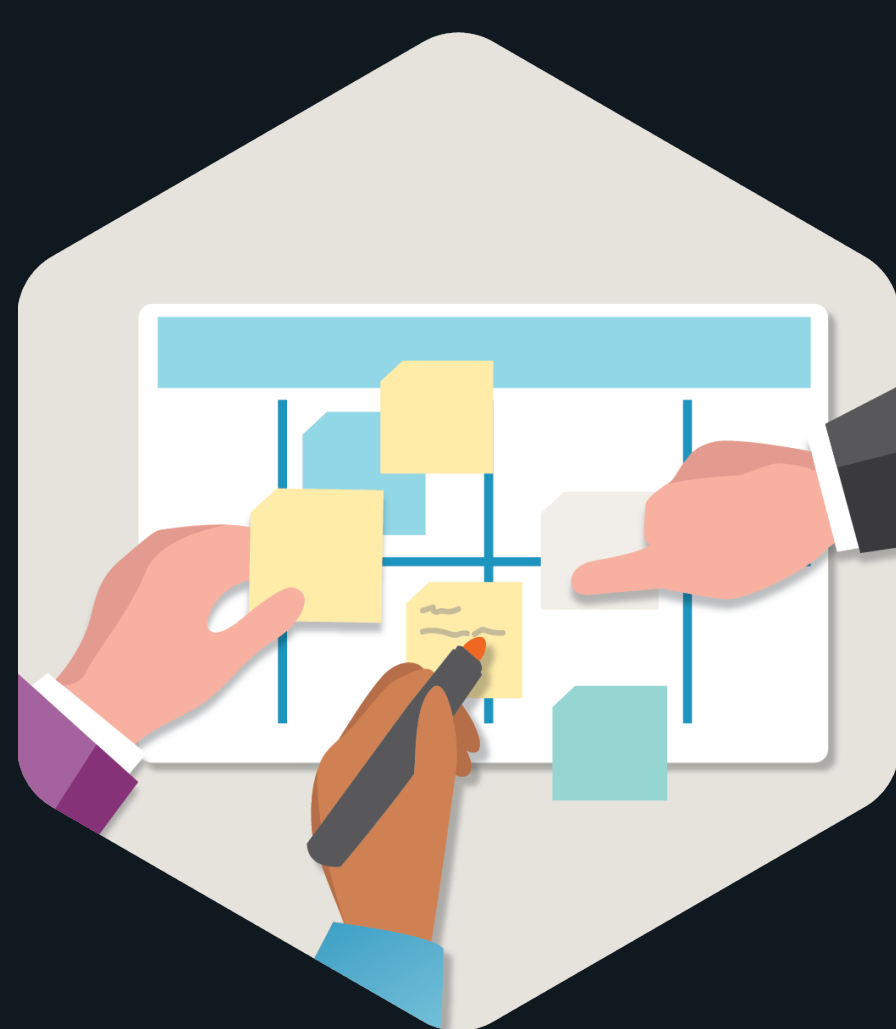

Eficode

WHO WE ARE

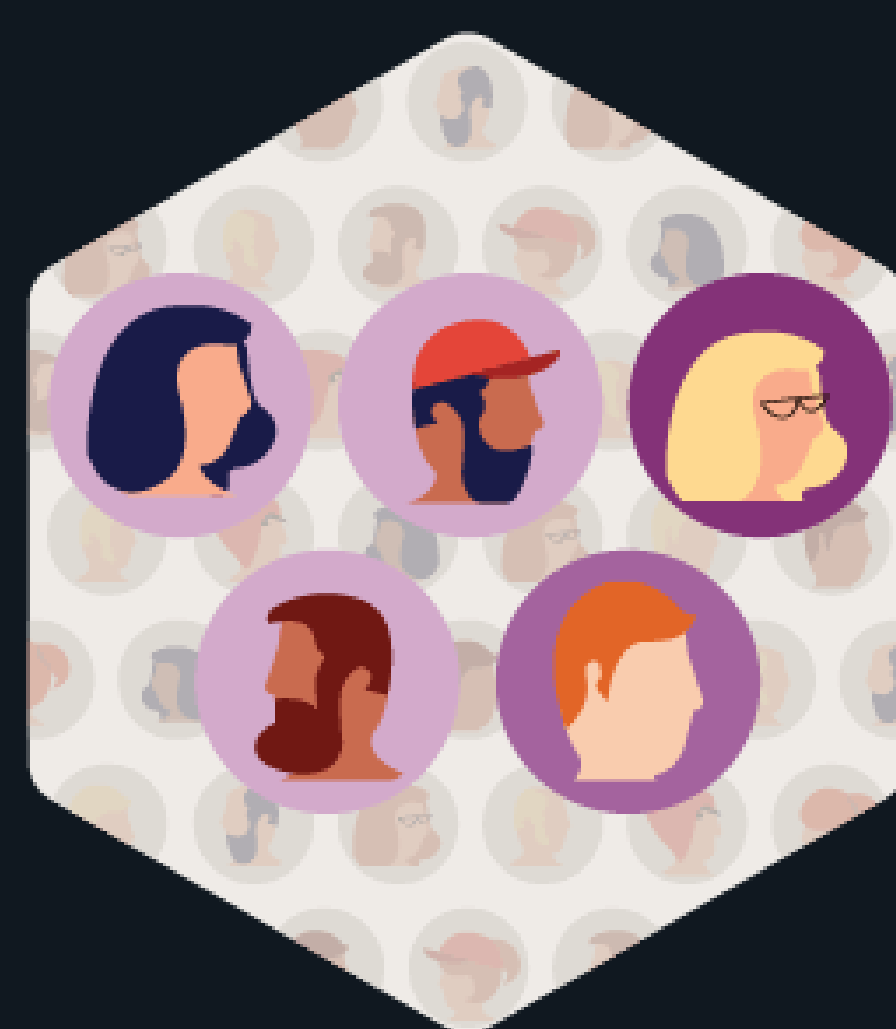

Eficode is the leading DevOps company in Europe, driving the DevOps and Agile movement and building the future of software development across 10 countries with almost 600 professionals. Thanks to our user-centered design approach, agile methodologies, and robust DevOps practices, your software development is future-proof.
